

# 3-IN-1 MULTIFUNCTION DEVICE

Ionic Footbath + Antiparasitic Zapper + Heating Belt

- Handcrafted with passion
- 30-day Satisfaction | 2-year Warranty
- Quick start guide, user manual
- Convenient, safe, easy to use
- Sleek, compact, portable design
- Quality, durability, reliability, efficiency

## NEGATIVE ION DEFICIENCY

- Excessive free radical buildup
- Generalized body acidification
- Impaired microcirculation
- Weak cellular functions
- Sluggish metabolic processes
- Accelerated aging

## NEGATIVE ION RECHARGE

- Powerful antioxidant impact
- Beneficial alkalizing effect
- Enhanced tissue purification
- Improved nutrient delivery
- Boosted circulatory systems
- Improved cell regeneration

## WHAT CUSTOMERS REPORT

# A PROVEN SOLUTION FOR RENEWED WELL-BEING

## AN UNHEALTHY BODY ACCUMULATES

Generalized acidosis  
Oxidative stress | Free radicals  
Chemical pollution  
Heavy metals | Toxins  
Fungi | Yeast  
Parasites | Bacteria  
Excess mucus  
Dehydration | Hypoxia

## A HEALTHY BODY NEEDS TO:

Alkalize | Deacidify  
Cleanse | Detoxify  
Energize | Strengthen  
Eliminate | Protect  
Assimilate | Regenerate  
Distribute | Provide  
Hydrate | Oxygenate  
Relieve | Relax

## 3-in-1 VitalBody

AN ACCESSIBLE HOLISTIC ALTERNATIVE

### VitalAxiom innovative device

- Restores body bioelectricity
- Deeply cleanses and alkalizes
- Nourishes and soothes the nervous system
- Optimizes cellular functions
- Rebalances metabolic processes
- Eases fluid microcirculation
- Restores vital energy flow
- Re-establishes vital energy flow
- Improves immune defenses

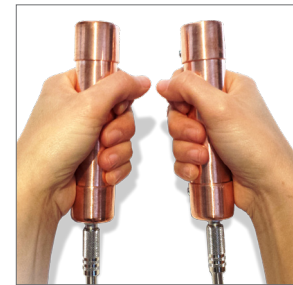

# DEEP CLEANSING THE BODY WITH 3 EFFECTIVE TECHNOLOGIES

## 1 Ionizing and detoxifying electrolytic footbath

Deacidifies, energizes and revitalizes all the body's cells

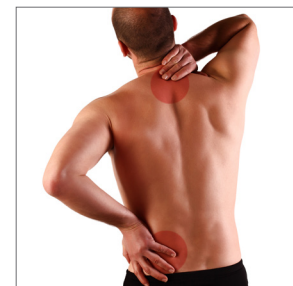

## 2 Multifrequency antiparasitic generator | Zapper

Helps your immune system kill pathogens

## 3 Far infrared heating belt

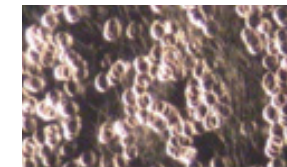

Locally reduces stiffness and tension

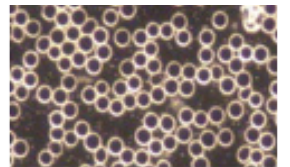

## QUALITATIVE LIVE BLOOD ANALYSIS

Live blood analysis before and after 14 ionic sessions using high-resolution dark field microscopy reveals important changes in the visual characteristics of red blood cells. The "rouleaux" formations or clumping observed initially have been replaced by better-formed and more distant red blood cells. As a result, blood and lymphatic fluids are less viscous, allowing better microcirculation throughout the body. In addition, since the peripheral surfaces of cell membranes are more exposed and accessible, the absorption and transfer of nutrients, as well as hydration and the absorption of cellular oxygen are naturally optimized.

BEFORE

Non-ionized environment  
Low electric potential  
Poor hydration (H<sub>2</sub>O)  
Poor oxygenation (O<sub>2</sub>)  
Acidic environment (pH < 7.0)

AFTER

Ionized environment  
High electric potential  
Proper hydration (H<sub>2</sub>O)  
Proper oxygenation (O<sub>2</sub>)  
Alkaline environment (pH ≥ 7.0)
